

Changement d'IP sur le Sagem 1201 V2

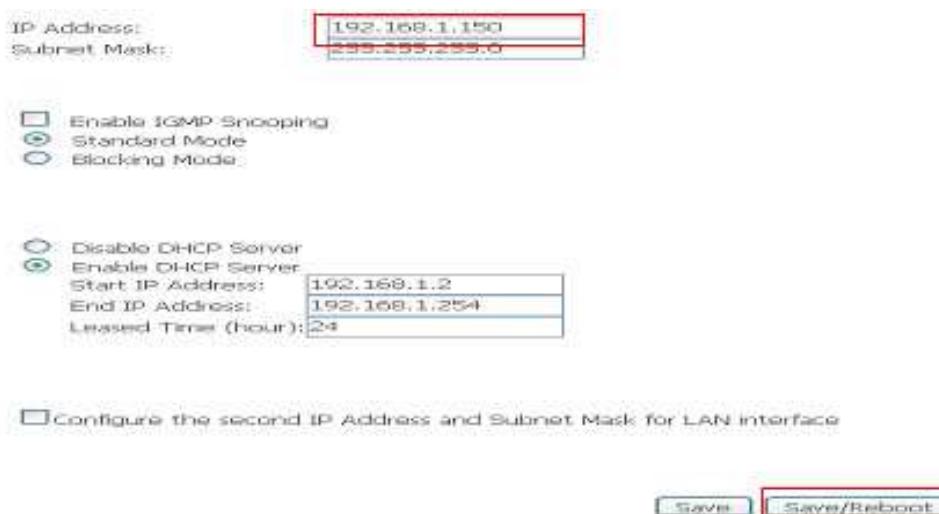

Après avoir accéder à l'interface du routeur via l'adresse **192.168.1.1** et taper **admin** comme Login et Mot de passe.

1. Passer sur « **Advanced Setup** » cliquer sur « **LAN** ».

The screenshot shows the 'Advanced Setup' menu on the left with 'LAN' selected. On the right, the LAN configuration page is displayed. It includes fields for IP Address (192.168.1.1) and Subnet Mask (255.255.255.0). Under 'IGMP Snooping', 'Standard Mode' is selected. Under 'DHCP Server', 'Enable DHCP Server' is selected, with Start IP Address set to 192.168.1.2 and End IP Address set to 192.168.1.254, and Leased Time (hour) set to 24.

2. Saisir **l'adresse IP locale** voulue déjà préconfigurée sur la carte réseau puis Cliquer sur « **Save/Reboot** ».

The screenshot shows the same LAN configuration page after changes. The IP Address field now contains 192.168.1.150 and the Subnet Mask field contains 255.255.255.0. Under 'IGMP Snooping', 'Standard Mode' is selected. Under 'DHCP Server', 'Enable DHCP Server' is selected, with Start IP Address set to 192.168.1.2 and End IP Address set to 192.168.1.254, and Leased Time (hour) set to 24. A checkbox at the bottom left is checked, stating 'Configure the second IP Address and Subnet Mask for LAN interface'. At the bottom right, the 'Save' button is in a light blue box, and the 'Save/Reboot' button is highlighted with a red border.
